Vol. 57

Index/Contents

2007

Subject Index

Accuracy Assessments
A Statistical Assessment of Saturation and Mobile Sampling Strategies to Estimate Long-Term Average Concentrations across Urban Areas, 1396

Acrolein
Laboratory Evaluation of an Aldehyde Scrubber System Specifically for the Detection of Acrolein, 1370

Activated Carbon
Prediction of the Adsorption Capacity for Volatile Organic Compounds onto Activated Carbons by the Dubinin–Radushkevich–Langmuir Model, 497
Removal of Hydrogen Sulfide and Sulfur Dioxide by Carbons Impregnated with Triethylenediamine, 1461

Active Surface Area
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Adsorption
Prediction of the Adsorption Capacity for Volatile Organic Compounds onto Activated Carbons by the Dubinin–Radushkevich–Langmuir Model, 497
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204

AERMOD
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489
Using Prognostic Model-Generated Meteorological Output in the AERMOD Dispersion Model: An Illustrative Application in Philadelphia, PA, 586

Aerosol
Emissions of Chromium (VI) from Arc Welding, 252
Improving Estimation of Indoor Exposure to Inhalable Particles for Children in the First Year of Life, 934

Aerosol Characterization Experiments (ACE)–Asia
Characterization of $PM_{2.5}$ Aerosols Dominated by Local Pollution and Asian Dust Observed at an Urban Site in Korea during Aerosol Characterization Experiments (ACE)–Asia Project, 434

Aerosol Microphysical Properties
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 1—Method Development, 1351

Aerosol Optical Depth (AOD)
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 1—Method Development, 1351

Aerosol, Optical Properties
Fine and Coarse Particulate Matter Chemical Characterization in a Heavily Industrialized City in Central Mexico during Winter 2003, 620

Aerosols
Causes of Haze in the Columbia River Gorge, 947
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596
Passive Sampler for $PM_{10-2.5}$ Aerosol, 332
A Simple Procedure for Correcting Loading Effects of Aethalometer Data, 1214

Aethalometer
A Simple Procedure for Correcting Loading Effects of Aethalometer Data, 1214

Agricultural Waste
Effects of Burnings of Wax Apple Stubble and Rice Straw on Polychlorinated Dibenzo-*p*-Dioxin and Dibenzofuran Concentrations in Air and Soil, 457

Agriculture
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761

Air Curtain Destructors
Emissions from the Burning of Vegetative Debris in Air Curtain Destructors, 959

Air Dispersion Modeling
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439

Air Pollution
Benefits of Mitigated Ambient Air Quality Due to Transportation Control on Childhood Asthma Hospitalization during the 2002 Summer Asian Games in Busan, Korea, 968
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39
Biofilm Growth-Percolation Models and Channeling in Biofilter Clogging, 882
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981
Development of Cleaner-Burning Brick Kilns in Ciudad Juarez, Chihuahua, Mexico, 444
Energy Use and Emissions from Marine Vessels: A Total Fuel Life Cycle Approach, 102
Identification and Interpretation of Representative Ozone Distributions in Association with the Sea Breeze from Different Synoptic Winds over the Coastal Urban Area in Korea, 1480
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785
Source Apportionment of Daily Fine Particulate Matter at Jefferson Street, Atlanta, GA, during Summer and Winter, 228
Use of *n*-Fold Cross-Validation to Evaluate Three Methods to Calculate Heavy Truck Annual Average Daily Traffic and Vehicle Miles Traveled, 4
A Vehicle Emissions System Using a Car Simulator and a Geographical Information System: Part 1—System Description and Testing, 1234

Air Pollution Control
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204
A&WMA in the Modern Era, 1001

Air Pollution Trends
Trends in the Elemental Composition of Fine Particulate Matter in Santiago, Chile, from 1998 to 2003, 845

Air Quality
Apportionment of Ambient Primary and Secondary Fine Particulate Matter during a 2001 Summer Intensive Study at the CMU Supersite and NETL Pittsburgh Site, 1251
Compilation and Assessment of Recent Positive Matrix Factorization and UNMIX Receptor Model Studies on Fine Particulate Matter Source Apportionment for the Eastern United States, 1307
Determination of Ozone in Outdoor and Indoor Environments Using Nitrite-Impregnated Passive Samplers Followed by Ion Chromatography, 974
Gaseous Ammonia Uptake in Compost Biofilters as Related to Compost Water Content, 940
Impact of Underestimating the Effects of Cold Temperature on Motor Vehicle Start Emissions of Air Toxics in the United States, 1469
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596
Mathematical Model for Photocatalytic Destruction of Organic Contaminants in Air, 1112
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420
A Statistical Assessment of Saturation and Mobile Sampling Strategies to Estimate Long-Term Average Concentrations across Urban Areas, 1396
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111

Air Quality Management (AQM)
Introduction to the A&WMA Critical Review, 650
2007 Critical Review—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 652
2007 Critical Review Discussion—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 1151

Air Toxics
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47
Impact of Underestimating the Effects of Cold Temperature on Motor Vehicle Start Emissions of Air Toxics in the United States, 1469
A Method of Assessing Air Toxics Concentrations in Urban Areas Using Mobile Platform Measurements, 1286
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204
Using Prognostic Model-Generated Meteorological Output in the AERMOD Dispersion Model: An Illustrative Application in Philadelphia, PA, 586
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172
Volatile Organic Compound Emissions from Dry Mill Fuel Ethanol Production, 1091

Airflow
Characterization and Identification of Trends in Average Ambient Ozone and Fine Particulate Matter Levels through Trajectory Cluster Analysis in Eastern Canada, 907

Alternative/Innovative Technology
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190
Fugitive Emissions Opacity Determination Using the Digital Opacity Compliance System (DOCS), 1317
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172

Ambient Air
Determination of Ozone in Outdoor and Indoor Environments Using Nitrite-Impregnated Passive Samplers Followed by Ion Chromatography, 974

Ammonia (NH_3)
Effects of Sulfur Dioxide and Oxides of Nitrogen Emission Reductions on Fine Particulate Matter Mass Concentrations: Regional Comparisons, 1337
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489
TiO_2 Nanotube-Supported Cu as the Catalyst for Selective NO Reduction with NH_3, 600
Two-Stage Biofilter for Effective NH_3 Removal from Waste Gases Containing High Concentrations of H_2S, 337

Ammonia (NH_3) Removal
Gaseous Ammonia Uptake in Compost Biofilters as Related to Compost Water Content, 940

Amorphous Volume Fraction
Encapsulation Behaviors of Metals in Slags Containing Various Amorphous Volume Fractions, 820

Anaerobic
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309

Analytical Methods
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

AP-42 Databases
Determination of Volatile Organic Profiles and Photochemical Potentials from Chemical Manufacture Process Vents, 698

Aquatic Toxicity
A Comparison of Acute Toxicity of Biodiesel, Biodiesel Blends, and Diesel on Aquatic Organisms, 286

Area Sources
Which Meteorological Conditions Produce Worst-Case Odors from Area Sources?, 1296

ARIMA Time-Series Model
Establishment of a Box-Jenkins Multivariate Time-Series Model to Simulate Ground-Level Peak Daily One-Hour Ozone Concentrations at Ta-Liao in Taiwan, 1078

Arsenic
Dilution-Based Emissions Sampling from Stationary Sources: Part 1—Compact Sampler Methodology and Performance, 65

Asian Dust
Characterization of $PM_{2.5}$ Aerosols Dominated by Local Pollution and Asian Dust Observed at an Urban Site in Korea during Aerosol Characterization Experiments (ACE)–Asia Project, 434

Association (A&WMA) News
A&WMA Celebrates 100 Years of Environmental Stewardship in 2007, 135
A&WMA in the Modern Era, 1001
Challenges and Opportunities at the Dawn of A&WMA's Second Century, 1555
Coal and the Battle Against Smoke: The Early Days of A&WMA, 382
The First Half-Century: Pre- and Post-World War II Growth, 636
From *Air Repair* to *EM*: A&WMA's Publications through a Century of Change, 1269

Atmospheric Particles
Gas Chromatographic Analysis of Organic Marker Compounds in Fine Particulate Matter Using Solid-Phase Microextraction, 53

Attenuation Factor
Concentration of Tetrachloroethylene in Indoor Air at a Former Dry Cleaner Facility as a Function of Subsurface Contamination: A Case Study, 753

Auditing
Trends in the Elemental Composition of Fine Particulate Matter in Santiago, Chile, from 1998 to 2003, 845

Automotive
A Vehicle Emissions System Using a Car Simulator and a Geographical Information System: Part 1—System Description and Testing, 1234

Back-Trajectories
Characterization and Identification of Trends in Average Ambient Ozone and Fine Particulate Matter Levels through Trajectory Cluster Analysis in Eastern Canada, 907

Benzene
Characteristics of Photocatalytic Oxidation of Toluene, Benzene, and Their Mixture, 94

Beta Gauge
Evaluation and Comparison of Continuous Fine Particulate Matter Monitors for Measurement of Ambient Aerosols, 1499

Biodegradation
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39

Biodiesel
A Comparison of Acute Toxicity of Biodiesel, Biodiesel Blends, and Diesel on Aquatic Organisms, 286
A New Alternative Fuel for Reduction of Polycyclic Aromatic Hydrocarbon and Particulate Matter Emissions from Diesel Engines, 465

Biodiesel Blends
A Comparison of Acute Toxicity of Biodiesel, Biodiesel Blends, and Diesel on Aquatic Organisms, 286

Biofilm
Biofilm Growth-Percolation Models and Channeling in Biofilter Clogging, 882

Biofilter
Biofilm Growth-Percolation Models and Channeling in Biofilter Clogging, 882
Gaseous Ammonia Uptake in Compost Biofilters as Related to Compost Water Content, 940
Two-Stage Biofilter for Effective NH_3 Removal from Waste Gases Containing High Concentrations of H_2S, 337

Biological Contaminants
Indoor- and Outdoor-Derived Contaminants in Urban and Rural Homes in Ottawa, Ontario, Canada, 297

Biological Treatment
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Biosolids
Evaluation of Quicklime Incorporation in Bench-Scale and Full-Scale Lime Stabilized Biosolids Using a Flat Surface pH Electrode, 794

Black Carbon (BC)
A Simple Procedure for Correcting Loading Effects of Aethalometer Data, 1214
Loading Effect Correction for Real-Time Aethalometer Measurements of Fresh Diesel Soot, 868

Blowing Agents
Release of Fluorocarbons from Insulation Foam in Home Appliances during Shredding, 1452

Boundary Layer
Identification and Interpretation of Representative Ozone Distributions in Association with the Sea Breeze from Different Synoptic Winds over the Coastal Urban Area in Korea, 1480

Brick Kilns
Development of Cleaner-Burning Brick Kilns in Ciudad Juarez, Chihuahua, Mexico, 444

Brown Coal Power Plants
Advantages and Possibilities of Solid Recovered Fuel Cocombustion in the European Energy Sector, 1178

Building Materials
Methyl Bromide as a Building Disinfectant: Interaction with Indoor Materials and Resulting Byproduct Formation, 576

Byproducts
Methyl Bromide as a Building Disinfectant: Interaction with Indoor Materials and Resulting Byproduct Formation, 576

Cafés
Real-Time Measurement of Outdoor Tobacco Smoke Particles, 522

Calcium
Evaluation of Quicklime Incorporation in Bench-Scale and Full-Scale Lime Stabilized Biosolids Using a Flat Surface pH Electrode, 794
Size and Composition Distributions of Particulate Matter Emissions: Part 2—Heavy-Duty Diesel Vehicles, 1429

Capping
A Laboratory Study of Sediment; Contaminant Release during Gas Ebullition, 1103

Carbon Dioxide (CO_2)
Relationship between Carbon Dioxide/Methane Emissions and the Water Quality/Sediment Characteristics of Taiwan's Main Rivers, 319

Carbon Monoxide (CO)
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47
Model for Forecasting Expressway Fine Particulate Matter and Carbon Monoxide Concentration: Application of Regression and Neural Network Models, 480

Carbonaceous Aerosol
Loading Effect Correction for Real-Time Aethalometer Measurements of Fresh Diesel Soot, 868

Carcinogenic Potencies
A New Alternative Fuel for Reduction of Polycyclic Aromatic Hydrocarbon and Particulate Matter Emissions from Diesel Engines, 465

Carnegie Mellon University (CMU) Supersite
Apportionment of Ambient Primary and Secondary Fine Particulate Matter during a 2001 Summer Intensive Study at the CMU Supersite and NETL Pittsburgh Site, 1251

Catalyst Deterioration
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223

CFC-11
Release of Fluorocarbons from Insulation Foam in Home Appliances during Shredding, 1452

Characterization
Analysis of Trace Elements and Ions in Ambient Fine Particulate Matter at Three Elementary Schools in Ohio, 394

Chemical Composition
Characterization of $PM_{2.5}$ Aerosols Dominated by Local Pollution and Asian Dust Observed at an Urban Site in Korea during Aerosol Characterization Experiments (ACE)–Asia Project, 434
Fine and Coarse Particulate Matter Chemical Characterization in a Heavily Industrialized City in Central Mexico during Winter 2003, 620

Chemical Mass Balance (CMB)
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Source Apportionment of Ambient Total Suspended Particulates and Coarse Particulate Matter in Urban Areas of Jiaozuo, China, 561

Chemical Mass Balance (CMB) Receptor Modeling
Source Apportionment of Fine Particulate Matter in the Southeastern United States, 1123

Childhood Asthma
Benefits of Mitigated Ambient Air Quality Due to Transportation Control on Childhood Asthma Hospitalization during the 2002 Summer Asian Games in Busan, Korea, 968

China
Comparison of Vehicle Activity and Emission Inventory between Beijing and Shanghai, 1172
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Clean Air Act
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439
Introduction to the A&WMA Critical Review, 650
2007 Critical Review—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 652
2007 Critical Review Discussion—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 1151

Clogging
Biofilm Growth-Percolation Models and Channeling in Biofilter Clogging, 882

Cluster Analysis
Characterization and Identification of Trends in Average Ambient Ozone and Fine Particulate Matter Levels through Trajectory Cluster Analysis in Eastern Canada, 907

Codigestion
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309

Coal
Coal and the Battle Against Smoke: The Early Days of A&WMA, 382

Coal-Burning Facilities
Fugitive Coke Oven Gas Emission Profile by Continuous Line Averaged Open-Path Fourier Transform Infrared Monitoring, 472

Coal Combustion
Evaluation of a Sequential Extraction Process Used for Determining Mercury Binding Mechanisms to Coal Combustion Byproducts, 856

Cocombustion
Advantages and Possibilities of Solid Recovered Fuel Cocombustion in the European Energy Sector, 1178

Coefficient of Divergence (CD)
Source Analysis of Particulate-Phase Polycyclic Aromatic Hydrocarbons in an Urban Atmosphere of a Northern City in China, 164

Collection Program
A Continuous Collection System for Household Pharmaceutical Wastes: A Pilot Project, 828

Columbia River
Causes of Haze in the Columbia River Gorge, 947

Combustion
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981

Community Multi-Scale Air Quality (CMAQ)
Source Apportionment of Fine Particles in Tennessee Using a Source-Oriented Model, 407

Compliance
Field Demonstration of Visible Opacity Photographic Systems, 31

Compost
Gaseous Ammonia Uptake in Compost Biofilters as Related to Compost Water Content, 940
A Fuzzy Composting Process Model, 535

Contaminant Transport
A Laboratory Study of Sediment; Contaminant Release during Gas Ebullition, 1103

Continuous Emissions Monitoring
Fugitive Coke Oven Gas Emission Profile by Continuous Line Averaged Open-Path Fourier Transform Infrared Monitoring, 472

Control Technologies
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489

Copper (Cu)
TiO_2 Nanotube-Supported Cu as the Catalyst for Selective NO Reduction with NH_3, 600

Critical Review
Introduction to the A&WMA Critical Review, 650
2007 Critical Review—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 652
2007 Critical Review Discussion—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 1151

Curbs and Gutters
Identifying Influencing Factors on Paved Roads Silt Loading, 778

Cyclone
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489

Daphnia magna
A Comparison of Acute Toxicity of Biodiesel, Biodiesel Blends, and Diesel on Aquatic Organisms, 286

Data Collection
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348

Data Quality
Use of *n*-Fold Cross-Validation to Evaluate Three Methods to Calculate Heavy Truck Annual Average Daily Traffic and Vehicle Miles Traveled, 4

Debris Disposal
Emissions from the Burning of Vegetative Debris in Air Curtain Destructors, 959

Decision-Making
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348

Decomposition
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243

Deposition
Numerical Study of the Effect of Ventilation Pattern on Coarse, Fine, and Very Fine Particulate Matter Removal in Partitioned Indoor Environment, 179

Destruction and Removal Efficiencies
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47

Diagnostic Ratios
Source Analysis of Particulate-Phase Polycyclic Aromatic Hydrocarbons in an Urban Atmosphere of a Northern City in China, 164

Diesel
Development of Molecular Marker Source Profiles for Emissions from On-Road Gasoline and Diesel Vehicle Fleets, 1190
Sensitivity of Source Apportionment of Urban Particulate Matter to Uncertainty in Motor Vehicle Emissions Profiles, 1200

Diesel Engine
Size and Composition Distributions of Particulate Matter Emissions: Part 2—Heavy-Duty Diesel Vehicles, 1429

Diesel Exhaust
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

Diesel Particles
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190

Digital Opacity Compliance System (DOCS)
Field Demonstration of Visible Opacity Photographic Systems, 31

Digital Photography
Field Evaluation of Digital Optical Method to Quantify the Visual Opacity of Plumes, 836

Dilution Samplers
Dilution-Based Emissions Sampling from Stationary Sources: Part 1—Compact Sampler Methodology and Performance, 65
Dilution-Based Emissions Sampling from Stationary Sources: Part 2—Gas-Fired Combustors Compared with Other Fuel-Fired Systems, 79

Dioxin
Effects of Burnings of Wax Apple Stubble and Rice Straw on Polychlorinated Dibenzo-*p*-Dioxin and Dibenzofuran Concentrations in Air and Soil, 457

Disinfectants
Methyl Bromide as a Building Disinfectant: Interaction with Indoor Materials and Resulting Byproduct Formation, 576

Dispersion Models
Which Meteorological Conditions Produce Worst-Case Odors from Area Sources?, 1296

DOW 704 Oil
Laboratory and Field Evaluation of Crystallized DOW 704 Oil on the Performance of the Well Impactor Ninety-Six Fine Particulate Matter Fractionator, 14

Downwind Plume
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111

D-R Equation
Prediction of the Adsorption Capacity for Volatile Organic Compounds onto Activated Carbons by the Dubinin–Radushkevich–Langmuir Model, 497

Driving Characteristics
Characteristics of Real-World Vehicular Emissions in Chinese Cities, 1379

Dust
Fugitive Emissions Opacity Determination Using the Digital Opacity Compliance System (DOCS), 1317

Dust Emissions
Identifying Influencing Factors on Paved Roads Silt Loading, 778

Eastern United States
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489

Eco-Indicator 95 Fuel
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

Electric Arc Furnace
Fate of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in a Fly Ash Treatment Plant, 1024

Electric Utilities
Environmental and Economic Evaluation of Bioenergy in Ontario, Canada, 919

Electricity
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

Electrohydrodynamic (EHD) Flow
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489

Elemental Carbon (EC)
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596
Loading Effect Correction for Real-Time Aethalometer Measurements of Fresh Diesel Soot, 868
Size and Composition Distributions of Particulate Matter Emissions: Part 1—Light-Duty Gasoline Vehicles, 1414
Size and Composition Distributions of Particulate Matter Emissions: Part 2—Heavy-Duty Diesel Vehicles, 1429
The IMPROVE A Temperature Protocol for Thermal/Optical Carbon Analysis: Maintaining Consistency with a Long-Term Database, 1014

Elemental Composition
Trends in the Elemental Composition of Fine Particulate Matter in Santiago, Chile, from 1998 to 2003, 845

Emergency Response Models
Modeling Dispersion from Toxic Gas Released after a Train Collision in Graniteville, SC, 268

Emission Controls
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204

Emission Factor
Characteristics of Real-World Vehicular Emissions in Chinese Cities, 1379
Characterization of In-Use Light-Duty Gasoline Vehicle Emissions by Remote Sensing in Beijing: Impact of Recent Control Measures, 1071
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061
Emissions of Chromium (VI) from Arc Welding, 252

Emission Inventories
Development of a Local Carbon Dioxide Emissions Inventory Based on Energy Demand and Waste Production, 1032
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387
Real-World Vehicle Emissions: A Summary of the Sixteenth Coordinating Research Council On-Road Vehicle Emissions Workshop, 139
Source Identifications of Airborne Fine Particles Using Positive Matrix Factorization and U.S. Environmental Protection Agency Positive Matrix Factorization, 811
Sulfur Dioxide and Nitrogen Oxides Emissions from U.S. Pulp and Paper Mills, 1980–2005, 901

Emission Models
A Vehicle Emissions System Using a Car Simulator and a Geographical Information System: Part 1—System Description and Testing, 1234

Emission Rates
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420
Size and Composition Distributions of Particulate Matter Emissions: Part 2—Heavy-Duty Diesel Vehicles, 1429

Emissions
A Vehicle Emissions System Using a Car Simulator and a Geographical Information System: Part 1—System Description and Testing, 1234
Advantages and Possibilities of Solid Recovered Fuel Cocombustion in the European Energy Sector, 1178
Dilution-Based Emissions Sampling from Stationary Sources: Part 1—Compact Sampler Methodology and Performance, 65
Energy Use and Emissions from Marine Vessels: A Total Fuel Life Cycle Approach, 102
Fugitive Emissions Opacity Determination Using the Digital Opacity Compliance System (DOCS), 1317
Impact of Underestimating the Effects of Cold Temperature on Motor Vehicle Start Emissions of Air Toxics in the United States, 1469
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038
Real-World Vehicle Emissions: A Summary of the Sixteenth Coordinating Research Council On-Road Vehicle Emissions Workshop, 139
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803
Source Identifications of Airborne Fine Particles Using Positive Matrix Factorization and U.S. Environmental Protection Agency Positive Matrix Factorization, 811

Emissions Characterization
Development of Molecular Marker Source Profiles for Emissions from On-Road Gasoline and Diesel Vehicle Fleets, 1190
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190
Field Demonstration of Visible Opacity Photographic Systems, 31
Particulate Emissions from U.S. Department of Defense Artillery Backblast Testing, 551
Real-World Vehicle Emissions: A Summary of the Sixteenth Coordinating Research Council On-Road Vehicle Emissions Workshop, 139
Relationship between Carbon Dioxide/Methane Emissions and the Water Quality/Sediment Characteristics of Taiwan's Main Rivers, 319
Source Identifications of Airborne Fine Particles Using Positive Matrix Factorization and U.S. Environmental Protection Agency Positive Matrix Factorization, 811
Volatile Organic Compound Emissions from Dry Mill Fuel Ethanol Production, 1091

Emissions Estimation
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061

Empirical Equation
Remediation of Soil Contaminated with Pyrene Using Ground Nanoscale Zero-Valent Iron, 221

Energy
Development of a Local Carbon Dioxide Emissions Inventory Based on Energy Demand and Waste Production, 1032
Production of Hydrogen-Rich Gas from Methane by Thermal Plasma Reform, 1447

Environmental Management
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

Environmental Stewardship
A&WMA Celebrates 100 Years of Environmental Stewardship in 2007, 135

Environmental Tobacco Smoke
Real-Time Measurement of Outdoor Tobacco Smoke Particles, 522

Environmental Transport
Modeling Dispersion from Toxic Gas Released after a Train Collision in Graniteville, SC, 268

Epidemiology
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Ethanol
Environmental and Economic Evaluation of Bioenergy in Ontario, Canada, 919
Volatile Organic Compound Emissions from Dry Mill Fuel Ethanol Production, 1091

Exhaust Emissions
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223

Exposure
Characterization of Solid-Phase Microextraction and Gas Chromatography for the Analysis of Gasoline Tracers in Different Microenvironments, 355
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Fates
Fate of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in a Fly Ash Treatment Plant, 1024

Federal Reference Method (FRM)
Evaluation and Comparison of Continuous Fine Particulate Matter Monitors for Measurement of Ambient Aerosols, 1499

Fine Particles
Dilution-Based Emissions Sampling from Stationary Sources: Part 2—Gas-Fired Combustors Compared with Other Fuel-Fired Systems, 79
Source Apportionment of Fine Particles in Tennessee Using a Source-Oriented Model, 407
Trends in the Elemental Composition of Fine Particulate Matter in Santiago, Chile, from 1998 to 2003, 845

Fine Particulate Matter
Characterization of $PM_{2.5}$ Aerosols Dominated by Local Pollution and Asian Dust Observed at an Urban Site in Korea during Aerosol Characterization Experiments (ACE)–Asia Project, 434

Flares
Industrial Sources Influence Air Concentrations of Hydrogen Sulfide and Sulfur Dioxide in Rural Areas of Western Canada, 1241

Flat Surface pH Electrode
Evaluation of Quicklime Incorporation in Bench-Scale and Full-Scale Lime Stabilized Biosolids Using a Flat Surface pH Electrode, 794

Flow Rate
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489

Fluidized Reactor
Simultaneous Removal of NO and SO_2 by High-Temperature Fluidized Zero-Valent Iron Processes, 303

Fly Ash
A Comparison between Sludge Ash and Fly Ash on the Improvement in Soft Soil, 59
Encapsulation Behaviors of Metals in Slags Containing Various Amorphous Volume Fractions, 820
Evaluation of a Sequential Extraction Process Used for Determining Mercury Binding Mechanisms to Coal Combustion Byproducts, 856
Fate of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in a Fly Ash Treatment Plant, 1024

Forecasting
Model for Forecasting Expressway Fine Particulate Matter and Carbon Monoxide Concentration: Application of Regression and Neural Network Models, 480

Fossil Fuel Selection
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

Fractional AOD
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 2—A Case Study, 1360

Freeway
Model for Forecasting Expressway Fine Particulate Matter and Carbon Monoxide Concentration: Application of Regression and Neural Network Models, 480

Fugitive Emissions
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061
Equivalent Leak Definitions for Smart LDAR (Leak Detection and Repair) When Using Optical Imaging Technology, 1050
Fugitive Coke Oven Gas Emission Profile by Continuous Line Averaged Open-Path Fourier Transform Infrared Monitoring, 472
Fugitive Emissions Opacity Determination Using the Digital Opacity Compliance System (DOCS), 1317
Particulate Emissions from U.S. Department of Defense Artillery Backblast Testing, 551
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803

Fuzzy Modeling
A Fuzzy Composting Process Model, 535

Gas Bubble Ebullition
A Laboratory Study of Sediment; Contaminant Release during Gas Ebullition, 1103

Gas Chromatography (GC) Analysis
Gas Chromatographic Analysis of Organic Marker Compounds in Fine Particulate Matter Using Solid-Phase Microextraction, 53

Gas Chromatography–Mass Spectrometry (GC–MS)
Source Apportionment of Daily Fine Particulate Matter at Jefferson Street, Atlanta, GA, during Summer and Winter, 228

Gas Combustion Emissions
Dilution-Based Emissions Sampling from Stationary Sources: Part 2—Gas-Fired Combustors Compared with Other Fuel-Fired Systems, 79

Gas Emission
Release of Fluorocarbons from Insulation Foam in Home Appliances during Shredding, 1452

Gasoline
Development of Molecular Marker Source Profiles for Emissions from On-Road Gasoline and Diesel Vehicle Fleets, 1190
Sensitivity of Source Apportionment of Urban Particulate Matter to Uncertainty in Motor Vehicle Emissions Profiles, 1200

Gasoline Exhaust
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

Gasoline Tracers
Characterization of Solid-Phase Microextraction and Gas Chromatography for the Analysis of Gasoline Tracers in Different Microenvironments, 355

Gasoline Vehicles
Size and Composition Distributions of Particulate Matter Emissions: Part 1—Light-Duty Gasoline Vehicles, 1414

Gel Permeation Chromatography (GPC)
Determination of Nonylphenol Ethoxylates and Octylphenol Ethoxylates in Environmental Samples Using ^{13}C-Labeled Surrogate Compounds, 1164

Global Positioning System (GPS)
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348

Global Warming/Greenhouse Effect
Environmental and Economic Evaluation of Bioenergy in Ontario, Canada, 919

Gravitational Settling
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111

Greenhouse Gas Emissions (GHGs)
Relationship between Carbon Dioxide/Methane Emissions and the Water Quality/Sediment Characteristics of Taiwan's Main Rivers, 319
Development of a Local Carbon Dioxide Emissions Inventory Based on Energy Demand and Waste Production, 1032

Ground-Level Ozone
Establishment of a Box-Jenkins Multivariate Time-Series Model to Simulate Ground-Level Peak Daily One-Hour Ozone Concentrations at Ta-Liao in Taiwan, 1078

Hazardous Air Pollutants (HAPs)
Modeling Dispersion from Toxic Gas Released after a Train Collision in Graniteville, SC, 268

Hazardous Waste
Removal of Hydrogen Sulfide and Sulfur Dioxide by Carbons Impregnated with Triethylenediamine, 1461
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038

Haze
Causes of Haze in the Columbia River Gorge, 947

Health Benefits
Benefits of Mitigated Ambient Air Quality Due to Transportation Control on Childhood Asthma Hospitalization during the 2002 Summer Asian Games in Busan, Korea, 968

Health Effects/Risks
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Heating Period
Source Analysis of Particulate-Phase Polycyclic Aromatic Hydrocarbons in an Urban Atmosphere of a Northern City in China, 164

Heavy Trucks
Use of *n*-Fold Cross-Validation to Evaluate Three Methods to Calculate Heavy Truck Annual Average Daily Traffic and Vehicle Miles Traveled, 4

Hexavalent Chromium (VI)
Emissions of Chromium (VI) from Arc Welding, 252

Hog Manure
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761

Household Medication
A Continuous Collection System for Household Pharmaceutical Wastes: A Pilot Project, 828

Human Exposure
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420
A Statistical Assessment of Saturation and Mobile Sampling Strategies to Estimate Long-Term Average Concentrations across Urban Areas, 1396

Hydrocarbons (HC)
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223

Hydrogen Sulfide
Two-Stage Biofilter for Effective NH_3 Removal from Waste Gases Containing High Concentrations of H_2S, 337

Hydrogen Yield
Production of Hydrogen-Rich Gas from Methane by Thermal Plasma Reform, 1447

Immobilization
Encapsulation Behaviors of Metals in Slags Containing Various Amorphous Volume Fractions, 820

IMPROVE
Revised Algorithm for Estimating Light Extinction from IMPROVE Particle Speciation Data, 1326

In Memoriam
In Memory of A&WMA Member Charles W. Lewis, 1938–2007, 267

In Memory of Prof. William Licht, 1915–2006, 3

Indoor Air
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981
Characteristics of Photocatalytic Oxidation of Toluene, Benzene, and Their Mixture, 94
Concentration of Tetrachloroethylene in Indoor Air at a Former Dry Cleaner Facility as a Function of Subsurface Contamination: A Case Study, 753

Indoor Air Pollution
Determination of Ozone in Outdoor and Indoor Environments Using Nitrite-Impregnated Passive Samplers Followed by Ion Chromatography, 974
Indoor- and Outdoor-Derived Contaminants in Urban and Rural Homes in Ottawa, Ontario, Canada, 297
Mathematical Model for Photocatalytic Destruction of Organic Contaminants in Air, 1112

Indoor and Outdoor Particle and Gas Levels
Indoor/Outdoor Relationships, Trends, and Carbonaceous Content of Fine Particulate Matter in Retirement Homes of the Los Angeles Basin, 366

Indoor and Outdoor $PM_{2.5}$ Sources
Indoor/Outdoor Relationships, Trends, and Carbonaceous Content of Fine Particulate Matter in Retirement Homes of the Los Angeles Basin, 366

Industrial Pollution
Industrial Sources Influence Air Concentrations of Hydrogen Sulfide and Sulfur Dioxide in Rural Areas of Western Canada, 1241

Industrial Source Complex (ISC)
Comparison of the Industrial Source Complex and AERMOD Dispersion Models: Case Study for Human Health Risk Assessment, 1439

Inhalable Particles
Trends in the Elemental Composition of Fine Particulate Matter in Santiago, Chile, from 1998 to 2003, 845

Input/Output Mass
Fate of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in a Fly Ash Treatment Plant, 1024

Insulation Foam
Release of Fluorocarbons from Insulation Foam in Home Appliances during Shredding, 1452

^{13}C-Labeled Surrogate
Determination of Nonylphenol Ethoxylates and Octylphenol Ethoxylates in Environmental Samples Using ^{13}C-Labeled Surrogate Compounds, 1164

Lagoons
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761

Landfilling
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39

Langmuir Isotherm
Prediction of the Adsorption Capacity for Volatile Organic Compounds onto Activated Carbons by the Dubinin–Radushkevich–Langmuir Model, 497

Las Vegas Valley
Identifying Influencing Factors on Paved Roads Silt Loading, 778

Leak Detection
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061
Equivalent Leak Definitions for Smart LDAR (Leak Detection and Repair) When Using Optical Imaging Technology, 1050

Life Cycle Analysis
Energy Use and Emissions from Marine Vessels: A Total Fuel Life Cycle Approach, 102

Life Cycle Assessment
Environmental and Economic Evaluation of Bioenergy in Ontario, Canada, 919

Light Absorption
Loading Effect Correction for Real-Time Aethalometer Measurements of Fresh Diesel Soot, 868

Light Extinction
Revised Algorithm for Estimating Light Extinction from IMPROVE Particle Speciation Data, 1326

Lime Stabilization
Evaluation of Quicklime Incorporation in Bench-Scale and Full-Scale Lime Stabilized Biosolids Using a Flat Surface pH Electrode, 794

Liquid Chromatography–Mass Spectrometry
Determination of Nonylphenol Ethoxylates and Octylphenol Ethoxylates in Environmental Samples Using ^{13}C-Labeled Surrogate Compounds, 1164

Loading Effect
Loading Effect Correction for Real-Time Aethalometer Measurements of Fresh Diesel Soot, 868
A Simple Procedure for Correcting Loading Effects of Aethalometer Data, 1214

Location–Allocation
Spatial Modeling for Air Pollution Monitoring Network Design: Example of Residential Woodsmoke, 893

Marine Emissions
Energy Use and Emissions from Marine Vessels: A Total Fuel Life Cycle Approach, 102

Measurement Techniques
A Method of Assessing Air Toxics Concentrations in Urban Areas Using Mobile Platform Measurements, 1286
Field Demonstration of Visible Opacity Photographic Systems, 31

Mechanically and Biologically Pretreated (MBP) Waste
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Mechanically and Biologically Treated (MBT) Waste
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Mechanically Sorted Organic Residues (MSOR)
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Mercury
Evaluation of a Sequential Extraction Process Used for Determining Mercury Binding Mechanisms to Coal Combustion Byproducts, 856

Metal Oxide Adsorbents
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204

Meteorological Conditions
Stable Plume Rise in a Shear Layer, 328
Using Prognostic Model-Generated Meteorological Output in the AERMOD Dispersion Model: An Illustrative Application in Philadelphia, PA, 586
Which Meteorological Conditions Produce Worst-Case Odors from Area Sources?, 1296

Methane (CH_4)
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47
Relationship between Carbon Dioxide/Methane Emissions and the Water Quality/Sediment Characteristics of Taiwan's Main Rivers, 319

Method 9
Field Evaluation of Digital Optical Method to Quantify the Visual Opacity of Plumes, 836

Methyl Bromide
Methyl Bromide as a Building Disinfectant: Interaction with Indoor Materials and Resulting Byproduct Formation, 576

Mexico
Fine and Coarse Particulate Matter Chemical Characterization in a Heavily Industrialized City in Central Mexico during Winter 2003, 620

Microenvironments
Characterization of Solid-Phase Microextraction and Gas Chromatography for the Analysis of Gasoline Tracers in Different Microenvironments, 355

MicroFac
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420

Military
Particulate Emissions from U.S. Department of Defense Artillery Backblast Testing, 551

Mobile Monitoring
A Method of Assessing Air Toxics Concentrations in Urban Areas Using Mobile Platform Measurements, 1286

Mobile Sampling
A Statistical Assessment of Saturation and Mobile Sampling Strategies to Estimate Long-Term Average Concentrations across Urban Areas, 1396

Mobile Sources
Energy Use and Emissions from Marine Vessels: A Total Fuel Life Cycle Approach, 102
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Real-World Vehicle Emissions: A Summary of the Sixteenth Coordinating Research Council On-Road Vehicle Emissions Workshop, 139
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420

Model Performance Statistics
Establishment of a Box-Jenkins Multivariate Time-Series Model to Simulate Ground-Level Peak Daily One-Hour Ozone Concentrations at Ta-Liao in Taiwan, 1078

Modeling
Biofilm Growth-Percolation Models and Channeling in Biofilter Clogging, 882
Industrial Sources Influence Air Concentrations of Hydrogen Sulfide and Sulfur Dioxide in Rural Areas of Western Canada, 1241
Mathematical Model for Photocatalytic Destruction of Organic Contaminants in Air, 1112
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489
Real-World Vehicle Emissions: A Summary of the Sixteenth Coordinating Research Council On-Road Vehicle Emissions Workshop, 139
Sensitivity Analysis and Evaluation of MicroFacPM: A Microscale Motor Vehicle Emission Factor Model for Particulate Matter Emissions, 420
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785
Stable Plume Rise in a Shear Layer, 328
Using Prognostic Model-Generated Meteorological Output in the AERMOD Dispersion Model: An Illustrative Application in Philadelphia, PA, 586

Molecular Markers
Sensitivity of Source Apportionment of Urban Particulate Matter to Uncertainty in Motor Vehicle Emissions Profiles, 1200

Monitoring
Determination of Ozone in Outdoor and Indoor Environments Using Nitrite-Impregnated Passive Samplers Followed by Ion Chromatography, 974
Field Demonstration of Visible Opacity Photographic Systems, 31
Passive Sampler for $PM_{10-2.5}$ Aerosol, 332
Spatial Modeling for Air Pollution Monitoring Network Design: Example of Residential Woodsmoke, 893

Monte Carlo Simulations
Equivalent Leak Definitions for Smart LDAR (Leak Detection and Repair) When Using Optical Imaging Technology, 1050

Mortality
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Motor Vehicles
Characteristics of Real-World Vehicular Emissions in Chinese Cities, 1379
Characterization of In-Use Light-Duty Gasoline Vehicle Emissions by Remote Sensing in Beijing: Impact of Recent Control Measures, 1071
Environmental and Economic Evaluation of Bioenergy in Ontario, Canada, 919
Use of *n*-Fold Cross-Validation to Evaluate Three Methods to Calculate Heavy Truck Annual Average Daily Traffic and Vehicle Miles Traveled, 4
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

Multiangle Imaging SpectroRadiometer (MISR)
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 1—Method Development, 1351

Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 2—A Case Study, 1360

Municipal Solid Waste
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348

National Ambient Air Quality Standards (NAAQS)
Analysis of Trace Elements and Ions in Ambient Fine Particulate Matter at Three Elementary Schools in Ohio, 394
2007 Critical Review—Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 652
2007 Critical Review Discussion: Will the Circle Be Unbroken: A History of the U.S. National Ambient Air Quality Standards, 1151
Introduction to the A&WMA Critical Review, 650

Nanoscale Iron
Remediation of Soil Contaminated with Pyrene Using Ground Nanoscale Zero-Valent Iron, 221

Natural Convection
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39

Nephelometer
Evaluation and Comparison of Continuous Fine Particulate Matter Monitors for Measurement of Ambient Aerosols, 1499

NETL Pittsburgh Site
Apportionment of Ambient Primary and Secondary Fine Particulate Matter during a 2001 Summer Intensive Study at the CMU Supersite and NETL Pittsburgh Site, 1251

Neural Networks
Model for Forecasting Expressway Fine Particulate Matter and Carbon Monoxide Concentration: Application of Regression and Neural Network Models, 480

Nitrate
Effects of Sulfur Dioxide and Oxides of Nitrogen Emission Reductions on Fine Particulate Matter Mass Concentrations: Regional Comparisons, 1337

Nitric Oxide (NO)
TiO_2 Nanotube-Supported Cu as the Catalyst for Selective NO Reduction with NH_3, 600

Nitrogen Dioxide (NO_2)
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785

Nitrogen Monoxide (NO)
Simultaneous Removal of NO and SO_2 by High-Temperature Fluidized Zero-Valent Iron Processes, 303

Nitrogen Oxides (NO_x)
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47
Sulfur Dioxide and Nitrogen Oxides Emissions from U.S. Pulp and Paper Mills, 1980–2005, 901

Nonylphenolethoxylates
Determination of Nonylphenol Ethoxylates and Octylphenol Ethoxylates in Environmental Samples Using ^{13}C-Labeled Surrogate Compounds, 1164

Octylphenolethoxylates
Determination of Nonylphenol Ethoxylates and Octylphenol Ethoxylates in Environmental Samples Using ^{13}C-Labeled Surrogate Compounds, 1164

Odors
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761
Evaluation of Quicklime Incorporation in Bench-Scale and Full-Scale Lime Stabilized Biosolids Using a Flat Surface pH Electrode, 794
Which Meteorological Conditions Produce Worst-Case Odors from Area Sources?, 1296

Oncorhynchus mykiss
A Comparison of Acute Toxicity of Biodiesel, Biodiesel Blends, and Diesel on Aquatic Organisms, 286

On-Road Emissions
Characteristics of Real-World Vehicular Emissions in Chinese Cities, 1379

Opacity
Field Demonstration of Visible Opacity Photographic Systems, 31
Field Evaluation of Digital Optical Method to Quantify the Visual Opacity of Plumes, 836
Fugitive Emissions Opacity Determination Using the Digital Opacity Compliance System (DOCS), 1317

Open Burning
Effects of Burnings of Wax Apple Stubble and Rice Straw on Polychlorinated Dibenzo-*p*-Dioxin and Dibenzofuran Concentrations in Air and Soil, 457
Emissions from the Burning of Vegetative Debris in Air Curtain Destructors, 959

Open Path Fourier Transform Infrared (OP-FTIR)
Fugitive Coke Oven Gas Emission Profile by Continuous Line Averaged Open-Path Fourier Transform Infrared Monitoring, 472

Optical Gas Imaging
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061
Equivalent Leak Definitions for Smart LDAR (Leak Detection and Repair) When Using Optical Imaging Technology, 1050

Organic Carbon (OC)
The IMPROVE_A Temperature Protocol for Thermal/Optical Carbon Analysis: Maintaining Consistency with a Long-Term Database, 1014
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596
Size and Composition Distributions of Particulate Matter Emissions: Part 1—Light-Duty Gasoline Vehicles, 1414

Organic Chemical Industrial Process
Determination of Volatile Organic Profiles and Photochemical Potentials from Chemical Manufacture Process Vents, 698

Organic Marker Compounds
Gas Chromatographic Analysis of Organic Marker Compounds in Fine Particulate Matter Using Solid-Phase Microextraction, 53

Outdoor Exposure
Real-Time Measurement of Outdoor Tobacco Smoke Particles, 522

Ozone (O_3)
Characterization and Identification of Trends in Average Ambient Ozone and Fine Particulate Matter Levels through Trajectory Cluster Analysis in Eastern Canada, 907
Determination of Ozone in Outdoor and Indoor Environments Using Nitrite-Impregnated Passive Samplers Followed by Ion Chromatography, 974
Identification and Interpretation of Representative Ozone Distributions in Association with the Sea Breeze from Different Synoptic Winds over the Coastal Urban Area in Korea, 1480

Ozone Yield
Determination of Volatile Organic Profiles and Photochemical Potentials from Chemical Manufacture Process Vents, 698

Paraffinic Fuel
A New Alternative Fuel for Reduction of Polycyclic Aromatic Hydrocarbon and Particulate Matter Emissions from Diesel Engines, 465

Partial Oxidation
Production of Hydrogen-Rich Gas from Methane by Thermal Plasma Reform, 1447

Particle Charge
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Particle Deposition
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Particle Emissions
Dilution-Based Emissions Sampling from Stationary Sources: Part 1—Compact Sampler Methodology and Performance, 65
Size and Composition Distributions of Particulate Matter Emissions: Part 1—Light-Duty Gasoline Vehicles, 1414

Particle Infiltration
Indoor/Outdoor Relationships, Trends, and Carbonaceous Content of Fine Particulate Matter in Retirement Homes of the Los Angeles Basin, 366

Particle Size Distribution
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 1—Method Development, 1351
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111

Particle Speciation
Revised Algorithm for Estimating Light Extinction from IMPROVE Particle Speciation Data, 1326

Particles
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981

Particulate Air Pollution
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981

Particulate Matter (PM)
Dilution-Based Emissions Sampling from Stationary Sources: Part 1—Compact Sampler Methodology and Performance, 65
Effects of Sulfur Dioxide and Oxides of Nitrogen Emission Reductions on Fine Particulate Matter Mass Concentrations: Regional Comparisons, 1337
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190
Improving Estimation of Indoor Exposure to Inhalable Particles for Children in the First Year of Life, 934
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596
Laboratory and Field Evaluation of Crystallized DOW 704 Oil on the Performance of the Well Impactor Ninety-Six Fine Particulate Matter Fractionator, 14
Particulate Emissions from U.S. Department of Defense Artillery Backblast Testing, 551
Real-Time Measurement of Outdoor Tobacco Smoke Particles, 522
Receptor Modeling of Ambient Particulate Matter Data Using Positive Matrix Factorization: Review of Existing Methods, 146
Short-Term Effects of Gaseous Pollutants on Cause-Specific Mortality in Wuhan, China, 785
Source Apportionment of Ambient Total Suspended Particulates and Coarse Particulate Matter in Urban Areas of Jiaozuo, China, 561
Source Identifications of Airborne Fine Particles Using Positive Matrix Factorization and U.S. Environmental Protection Agency Positive Matrix Factorization, 811
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Partitioned Building
Numerical Study of the Effect of Ventilation Pattern on Coarse, Fine, and Very Fine Particulate Matter Removal in Partitioned Indoor Environment, 179

Passive Samplers
Passive Sampler for $PM_{10-2.5}$ Aerosol, 332

Patio
Real-Time Measurement of Outdoor Tobacco Smoke Particles, 522

Paved Roads
Identifying Influencing Factors on Paved Roads Silt Loading, 778

Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans (PCDD/Fs)
Effects of Burnings of Wax Apple Stubble and Rice Straw on Polychlorinated Dibenzo-*p*-Dioxin and Dibenzofuran Concentrations in Air and Soil, 457
Fate of Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans in a Fly Ash Treatment Plant, 1024

Perchloroethylene (PCE)
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172

Petroleum Refinery Emissions
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803

Pharmaceutical and Personal Care Products (PPCP)
A Continuous Collection System for Household Pharmaceutical Wastes: A Pilot Project, 828

Phoenix, AZ
Source Apportionment of Fine Particulate Matter in Phoenix, AZ, Using Positive Matrix Factorization, 741

Photocatalysis
Characteristics of Photocatalytic Oxidation of Toluene, Benzene, and Their Mixture, 94

Photochemical Pollutants
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596

Plasma Systems
Effects of CH_4 and CO on the Reduction of Nitric Oxide to Nitrogen in a Discharge Reactor, 47

Plumes
Field Evaluation of Digital Optical Method to Quantify the Visual Opacity of Plumes, 836
Stable Plume Rise in a Shear Layer, 328

PM Emissions Composition
Dilution-Based Emissions Sampling from Stationary Sources: Part 2—Gas-Fired Combustors Compared with Other Fuel-Fired Systems, 79

PM_{10}
Dependence of Home Outdoor Particulate Mass and Number Concentrations on Residential and Traffic Features in Urban Areas, 1507
Fine and Coarse Particulate Matter Chemical Characterization in a Heavily Industrialized City in Central Mexico during Winter 2003, 620
Identifying Influencing Factors on Paved Roads Silt Loading, 778
Indoor- and Outdoor-Derived Contaminants in Urban and Rural Homes in Ottawa, Ontario, Canada, 297
Passive Sampler for $PM_{10-2.5}$ Aerosol, 332
Theoretical Study of the Impact of Particulate Matter Gravitational Settling on Ambient Coarse Particulate Matter Monitoring for Agricultural Emissions, 111

$PM_{10}/PM_{2.5}/PM_1$ Removal
Numerical Study of the Effect of Ventilation Pattern on Coarse, Fine, and Very Fine Particulate Matter Removal in Partitioned Indoor Environment, 179

$PM_{2.5}$
Analysis and Apportionment of Organic Carbon and Fine Particulate Matter Sources at Multiple Sites in the Midwestern United States, 606
Analysis of Trace Elements and Ions in Ambient Fine Particulate Matter at Three Elementary Schools in Ohio, 394
Apportionment of Ambient Primary and Secondary Fine Particulate Matter during a 2001 Summer Intensive Study at the CMU Supersite and NETL Pittsburgh Site, 1251
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981
Characterization and Identification of Trends in Average Ambient Ozone and Fine Particulate Matter Levels through Trajectory Cluster Analysis in Eastern Canada, 907
Compilation and Assessment of Recent Positive Matrix Factorization and UNMIX Receptor Model Studies on Fine Particulate Matter Source Apportionment for the Eastern United States, 1307
Dependence of Home Outdoor Particulate Mass and Number Concentrations on Residential and Traffic Features in Urban Areas, 1507
Development of Molecular Marker Source Profiles for Emissions from On-Road Gasoline and Diesel Vehicle Fleets, 1190
Evaluation and Comparison of Continuous Fine Particulate Matter Monitors for Measurement of Ambient Aerosols, 1499
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Fine and Coarse Particulate Matter Chemical Characterization in a Heavily Industrialized City in Central Mexico during Winter 2003, 620
Indoor- and Outdoor-Derived Contaminants in Urban and Rural Homes in Ottawa, Ontario, Canada, 297
Laboratory and Field Evaluation of Crystallized DOW 704 Oil on the Performance of the Well Impactor Ninety-Six Fine Particulate Matter Fractionator, 14
Model for Forecasting Expressway Fine Particulate Matter and Carbon Monoxide Concentration: Application of Regression and Neural Network Models, 480
Passive Sampler for $PM_{10-2.5}$ Aerosol, 332
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489
Sensitivity of Source Apportionment of Urban Particulate Matter to Uncertainty in Motor Vehicle Emissions Profiles, 1200
Source Apportionment of Daily Fine Particulate Matter at Jefferson Street, Atlanta, GA, during Summer and Winter, 228
Source Apportionment of Fine Particles in Tennessee Using a Source-Oriented Model, 407
Source Apportionment of Fine Particulate Matter in Phoenix, AZ, Using Positive Matrix Factorization, 741
Source Apportionment of Fine Particulate Matter in the Southeastern United States, 1123
Source Identifications of Airborne Fine Particles Using Positive Matrix Factorization and U.S. Environmental Protection Agency Positive Matrix Factorization, 811
Spatial Modeling for Air Pollution Monitoring Network Design: Example of Residential Woodsmoke, 893
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

$PM_{2.5}$ Emissions
Dilution-Based Emissions Sampling from Stationary Sources: Part 2—Gas-Fired Combustors Compared with Other Fuel-Fired Systems, 79

$PM_{2.5}$ Size Distribution
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 2—A Case Study, 1360

$PM_{2.5}$ Speciation
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 1—Method Development, 1351
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 2—A Case Study, 1360

Policy Decision-Making
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172

Pollutant Concentration
Characteristics of Indoor Aerosols in Residential Homes in Urban Locations: A Case Study in Singapore, 981

Pollution Prevention
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172

Polycyclic Aromatic Hydrocarbons (PAH)
Remediation of Soil Contaminated with Pyrene Using Ground Nanoscale Zero-Valent Iron, 221
Source Analysis of Particulate-Phase Polycyclic Aromatic Hydrocarbons in an Urban Atmosphere of a Northern City in China, 164

Positive Matrix Factorization (PMF)
Analysis and Apportionment of Organic Carbon and Fine Particulate Matter Sources at Multiple Sites in the Midwestern United States, 606
Causes of Haze in the Columbia River Gorge, 947
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190
Receptor Modeling of Ambient Particulate Matter Data Using Positive Matrix Factorization: Review of Existing Methods, 146
Source Apportionment of Fine Particulate Matter in Phoenix, AZ, Using Positive Matrix Factorization, 741

Potential Source Contribution Function (PSCF)
Analysis of Trace Elements and Ions in Ambient Fine Particulate Matter at Three Elementary Schools in Ohio, 394

Prediction
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243

Pretreatment
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39

Principal Component Analysis
Establishment of a Box-Jenkins Multivariate Time-Series Model to Simulate Ground-Level Peak Daily One-Hour Ozone Concentrations at Ta-Liao in Taiwan, 1078
Source Analysis of Particulate-Phase Polycyclic Aromatic Hydrocarbons in an Urban Atmosphere of a Northern City in China, 164

Proton Transfer Reaction Mass Spectrometry (PTR-MS)
Laboratory Evaluation of an Aldehyde Scrubber System Specifically for the Detection of Acrolein, 1370

Public Health
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038

Pulp and Paper Mills
Sulfur Dioxide and Nitrogen Oxides Emissions from U.S. Pulp and Paper Mills, 1980–2005, 901

Quantum Cascade Laser Infrared Absorption Spectroscopy (QCL)
Laboratory Evaluation of an Aldehyde Scrubber System Specifically for the Detection of Acrolein, 1370

Receptor Modeling
Analysis and Apportionment of Organic Carbon and Fine Particulate Matter Sources at Multiple Sites in the Midwestern United States, 606
Receptor Modeling of Ambient Particulate Matter Data Using Positive Matrix Factorization: Review of Existing Methods, 146
Source Apportionment of Daily Fine Particulate Matter at Jefferson Street, Atlanta, GA, during Summer and Winter, 228
Source Apportionment of Fine Particulate Matter in Phoenix, AZ, Using Positive Matrix Factorization, 741

Regenerative Thermal Oxidizer
Regenerative Thermal Oxidation of Airborne *N*, *N*-Dimethylformamide and Its Associated Nitrogen Oxides Formation Characteristics, 991

Regional Haze Rule
Revised Algorithm for Estimating Light Extinction from IMPROVE Particle Speciation Data, 1326

Regulations
The Viability of Professional Wet Cleaning as a Pollution Prevention Alternative to Perchloroethylene Dry Cleaning, 172

Remediation
Development of Cleaner-Burning Brick Kilns in Ciudad Juarez, Chihuahua, Mexico, 444

Remote Sensing
Characterization of In-Use Light-Duty Gasoline Vehicle Emissions by Remote Sensing in Beijing: Impact of Recent Control Measures, 1071
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803

Repair
Derivation of New Emission Factors for Quantification of Mass Emissions When Using Optical Gas Imaging for Detecting Leaks, 1061
Equivalent Leak Definitions for Smart LDAR (Leak Detection and Repair) When Using Optical Imaging Technology, 1050

Respiratory Health
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Response Surface Methodology
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309

Resuspended Dust
Improving Estimation of Indoor Exposure to Inhalable Particles for Children in the First Year of Life, 934

Robotics
Improving Estimation of Indoor Exposure to Inhalable Particles for Children in the First Year of Life, 934

Rotating Coating
Decomposition of Benzene and Toluene in Air Streams in Fixed-Film Photoreactors Coated with TiO_2 Catalyst, 279

Secondary Organic Aerosol
Investigation of a Systematic Offset in the Measurement of Organic Carbon with a Semicontinuous Analyzer, 596

Secondary Organic Aerosol (SOA) Formation
Indoor/Outdoor Relationships, Trends, and Carbonaceous Content of Fine Particulate Matter in Retirement Homes of the Los Angeles Basin, 366

Sediment
A Laboratory Study of Sediment; Contaminant Release during Gas Ebullition, 1103

Selective Catalytic Reduction (SCR)
TiO_2 Nanotube-Supported Cu as the Catalyst for Selective NO Reduction with NH_3, 600

Sequential Extraction
Evaluation of a Sequential Extraction Process Used for Determining Mercury Binding Mechanisms to Coal Combustion Byproducts, 856

Settlement
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243

Sewage Sludge
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309

Sewage Sludge Ash
A Comparison between Sludge Ash and Fly Ash on the Improvement in Soft Soil, 59

Silane
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204

Silt Loading
Identifying Influencing Factors on Paved Roads Silt Loading, 778

SITE Program Demonstration
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803

Site Selection
Spatial Modeling for Air Pollution Monitoring Network Design: Example of Residential Woodsmoke, 893

Slag
Encapsulation Behaviors of Metals in Slags Containing Various Amorphous Volume Fractions, 820

Small Utility Engines
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223

Smoke
Coal and the Battle Against Smoke: The Early Days of A&WMA, 382

Smoke School
Field Evaluation of Digital Optical Method to Quantify the Visual Opacity of Plumes, 836

Soft Soil
A Comparison between Sludge Ash and Fly Ash on the Improvement in Soft Soil, 59

Soil Gas
Concentration of Tetrachloroethylene in Indoor Air at a Former Dry Cleaner Facility as a Function of Subsurface Contamination: A Case Study, 753

Soil Remediation
Remediation of Soil Contaminated with Pyrene Using Ground Nanoscale Zero-Valent Iron, 221

Sol-Gel
Decomposition of Benzene and Toluene in Air Streams in Fixed-Film Photoreactors Coated with TiO_2 Catalyst, 279

Solid-Phase Microextraction
Characterization of Solid-Phase Microextraction and Gas Chromatography for the Analysis of Gasoline Tracers in Different Microenvironments, 355
Gas Chromatographic Analysis of Organic Marker Compounds in Fine Particulate Matter Using Solid-Phase Microextraction, 53

Solid Recovered Fuels (SRF)
Advantages and Possibilities of Solid Recovered Fuel Cocombustion in the European Energy Sector, 1178

Solid Waste
A Fuzzy Composting Process Model, 535

Soot
Development of Cleaner-Burning Brick Kilns in Ciudad Juarez, Chihuahua, Mexico, 444

Sorption
Methyl Bromide as a Building Disinfectant: Interaction with Indoor Materials and Resulting Byproduct Formation, 576

Sour Gas
Industrial Sources Influence Air Concentrations of Hydrogen Sulfide and Sulfur Dioxide in Rural Areas of Western Canada, 1241

Source Apportionment
Analysis and Apportionment of Organic Carbon and Fine Particulate Matter Sources at Multiple Sites in the Midwestern United States, 606
Analysis of Trace Elements and Ions in Ambient Fine Particulate Matter at Three Elementary Schools in Ohio, 394
Compilation and Assessment of Recent Positive Matrix Factorization and UNMIX Receptor Model Studies on Fine Particulate Matter Source Apportionment for the Eastern United States, 1307
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Receptor Modeling of Ambient Particulate Matter Data Using Positive Matrix Factorization: Review of Existing Methods, 146
Sensitivity of Source Apportionment of Urban Particulate Matter to Uncertainty in Motor Vehicle Emissions Profiles, 1200
Source Apportionment of Ambient Total Suspended Particulates and Coarse Particulate Matter in Urban Areas of Jiaozuo, China, 561
Source Apportionment of Daily Fine Particulate Matter at Jefferson Street, Atlanta, GA, during Summer and Winter, 228
Source Apportionment of Fine Particles in Tennessee Using a Source-Oriented Model, 407
Source Apportionment of Fine Particulate Matter in Phoenix, AZ, Using Positive Matrix Factorization, 741
Source Apportionment of Fine Particulate Matter in the Southeastern United States, 1123
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

Source Fingerprint
Fugitive Coke Oven Gas Emission Profile by Continuous Line Averaged Open-Path Fourier Transform Infrared Monitoring, 472

Source Profiles
Development of Molecular Marker Source Profiles for Emissions from On-Road Gasoline and Diesel Vehicle Fleets, 1190
Source Apportionment of Ambient Total Suspended Particulates and Coarse Particulate Matter in Urban Areas of Jiaozuo, China, 561
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

South Coast Air Basin
Evaluations of the Chemical Mass Balance Method for Determining Contributions of Gasoline and Diesel Exhaust to Ambient Carbonaceous Aerosols, 721
Variations in Speciated Emissions from Spark-Ignition and Compression-Ignition Motor Vehicles in California's South Coast Air Basin, 705

Spark-Ignition
Catalyst Deterioration over the Lifetime of Small Utility Engines, 1223
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190

Spatial Variability
A Statistical Assessment of Saturation and Mobile Sampling Strategies to Estimate Long-Term Average Concentrations across Urban Areas, 1396

SPECIATE 3.0
Determination of Volatile Organic Profiles and Photochemical Potentials from Chemical Manufacture Process Vents, 698

Speciated Trends Network (STN)
Analysis and Apportionment of Organic Carbon and Fine Particulate Matter Sources at Multiple Sites in the Midwestern United States, 606
Source Apportionment of Fine Particulate Matter in the Southeastern United States, 1123

Stable Atmosphere
Stable Plume Rise in a Shear Layer, 328

Stainless Steel
Emissions of Chromium (VI) from Arc Welding, 252

Statistical Modeling
Estimating Fine Particulate Matter Component Concentrations and Size Distributions Using Satellite-Retrieved Fractional Aerosol Optical Depth: Part 2—A Case Study, 1360

Sulfate
Effects of Sulfur Dioxide and Oxides of Nitrogen Emission Reductions on Fine Particulate Matter Mass Concentrations: Regional Comparisons, 1337

Sulfur Dioxide (SO_2)
Industrial Sources Influence Air Concentrations of Hydrogen Sulfide and Sulfur Dioxide in Rural Areas of Western Canada, 1241
Removal of Hydrogen Sulfide and Sulfur Dioxide by Carbons Impregnated with Triethylenediamine, 1461
Response of Inorganic Fine Particulate Matter to Emission Changes of Sulfur Dioxide and Ammonia: The Eastern United States as a Case Study, 1489
Simultaneous Removal of NO and SO_2 by High-Temperature Fluidized Zero-Valent Iron Processes, 303
Sulfur Dioxide and Nitrogen Oxides Emissions from U.S. Pulp and Paper Mills, 1980–2005, 901

Surface Area
Use of the Electrical Aerosol Detector as an Indicator of the Surface Area of Fine Particles Deposited in the Lung, 211

Suspension
Numerical Study of the Effect of Ventilation Pattern on Coarse, Fine, and Very Fine Particulate Matter Removal in Partitioned Indoor Environment, 179

Tail Exhaust
A New Alternative Fuel for Reduction of Polycyclic Aromatic Hydrocarbon and Particulate Matter Emissions from Diesel Engines, 465

Taiwan
Establishment of a Box-Jenkins Multivariate Time-Series Model to Simulate Ground-Level Peak Daily One-Hour Ozone Concentrations at Ta-Liao in Taiwan, 1078

Taiwan Power Generation
Life Cycle Assessment of Fuel Selection for Power Generation in Taiwan, 1387

Temperature
Impact of Underestimating the Effects of Cold Temperature on Motor Vehicle Start Emissions of Air Toxics in the United States, 1469
Which Meteorological Conditions Produce Worst-Case Odors from Area Sources?, 1296

Tapered Element Oscillating Monitors (TEOM)
Evaluation and Comparison of Continuous Fine Particulate Matter Monitors for Measurement of Ambient Aerosols, 1499

Tennessee
Source Apportionment of Fine Particles in Tennessee Using a Source-Oriented Model, 407

Testing
Volatile Organic Compound Emissions from Dry Mill Fuel Ethanol Production, 1091

Thermal Plasma
Production of Hydrogen-Rich Gas from Methane by Thermal Plasma Reform, 1447

Thermal Recovery Efficiency
Regenerative Thermal Oxidation of Airborne *N*, *N*-Dimethylformamide and Its Associated Nitrogen Oxides Formation Characteristics, 991

Thermodynamic Equilibrium
Effects of Sulfur Dioxide and Oxides of Nitrogen Emission Reductions on Fine Particulate Matter Mass Concentrations: Regional Comparisons, 1337

Thermophilic
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309

Titanium Dioxide (TiO_2)
Decomposition of Benzene and Toluene in Air Streams in Fixed-Film Photoreactors Coated with TiO_2 Catalyst, 279
TiO_2 Nanotube-Supported Cu as the Catalyst for Selective NO Reduction with NH_3, 600

Toddler (Children)
Improving Estimation of Indoor Exposure to Inhalable Particles for Children in the First Year of Life, 934

Toluene
Characteristics of Photocatalytic Oxidation of Toluene, Benzene, and Their Mixture, 94
Decomposition of Benzene and Toluene in Air Streams in Fixed-Film Photoreactors Coated with TiO_2 Catalyst, 279

Toxic Air Pollutants
Mathematical Model for Photocatalytic Destruction of Organic Contaminants in Air, 1112
Silane Removal at Ambient Temperature by Using Alumina-Supported Metal Oxide Adsorbents, 204

Toxic Gases
Removal of Hydrogen Sulfide and Sulfur Dioxide by Carbons Impregnated with Triethylenediamine, 1461

Toxics
A New Alternative Fuel for Reduction of Polycyclic Aromatic Hydrocarbon and Particulate Matter Emissions from Diesel Engines, 465

Traffic
Benefits of Mitigated Ambient Air Quality Due to Transportation Control on Childhood Asthma Hospitalization during the 2002 Summer Asian Games in Busan, Korea, 968
Dependence of Home Outdoor Particulate Mass and Number Concentrations on Residential and Traffic Features in Urban Areas, 1507
Indoor- and Outdoor-Derived Contaminants in Urban and Rural Homes in Ottawa, Ontario, Canada, 297

Transport Pathway
Characterization of $PM_{2.5}$ Aerosols Dominated by Local Pollution and Asian Dust Observed at an Urban Site in Korea during Aerosol Characterization Experiments (ACE)–Asia Project, 434

Triad Method
Concentration of Tetrachloroethylene in Indoor Air at a Former Dry Cleaner Facility as a Function of Subsurface Contamination: A Case Study, 753

Triethylenediamine
Removal of Hydrogen Sulfide and Sulfur Dioxide by Carbons Impregnated with Triethylenediamine, 1461

Urban Areas
Dependence of Home Outdoor Particulate Mass and Number Concentrations on Residential and Traffic Features in Urban Areas, 1507

U.S. Environmental Protection Agency (EPA)
Laboratory and Field Evaluation of Crystallized DOW 704 Oil on the Performance of the Well Impactor Ninety-Six Fine Particulate Matter Fractionator, 14

Ultrafine Particles
Factor Analysis of Submicron Particle Size Distributions near a Major United States–Canada Trade Bridge, 190
Dependence of Home Outdoor Particulate Mass and Number Concentrations on Residential and Traffic Features in Urban Areas, 1507
Size and Composition Distributions of Particulate Matter Emissions: Part 1—Light-Duty Gasoline Vehicles, 1414
Size and Composition Distributions of Particulate Matter Emissions: Part 2—Heavy-Duty Diesel Vehicles, 1429

Ultraviolet Light
Decomposition of Benzene and Toluene in Air Streams in Fixed-Film Photoreactors Coated with TiO_2 Catalyst, 279

Uncertainty
A Fuzzy Composting Process Model, 535

Urban
Comparison of Vehicle Activity and Emission Inventory between Beijing and Shanghai, 1172

Vapor Intrusion
Concentration of Tetrachloroethylene in Indoor Air at a Former Dry Cleaner Facility as a Function of Subsurface Contamination: A Case Study, 753

Vehicle Activity
Comparison of Vehicle Activity and Emission Inventory between Beijing and Shanghai, 1172

Vehicle Emissions Inventory
Comparison of Vehicle Activity and Emission Inventory between Beijing and Shanghai, 1172

Vehicle Miles Traveled (VMT) Estimates
Use of *n*-Fold Cross-Validation to Evaluate Three Methods to Calculate Heavy Truck Annual Average Daily Traffic and Vehicle Miles Traveled, 4

Ventilation
Numerical Study of the Effect of Ventilation Pattern on Coarse, Fine, and Very Fine Particulate Matter Removal in Partitioned Indoor Environment, 179

Visibility
Causes of Haze in the Columbia River Gorge, 947

Vitrification
Encapsulation Behaviors of Metals in Slags Containing Various Amorphous Volume Fractions, 820

Volatile Organic Compounds (VOCs)
Characteristics of Photocatalytic Oxidation of Toluene, Benzene, and Their Mixture, 94
Determination of Volatile Organic Profiles and Photochemical Potentials from Chemical Manufacture Process Vents, 698
Effectiveness of Porous Covers for Control of Ammonia, Reduced Sulfur Compounds, Total Hydrocarbons, Selected Volatile Organic Compounds, and Odor from Hog Manure Storage Lagoons, 761
Mathematical Model for Photocatalytic Destruction of Organic Contaminants in Air, 1112
Prediction of the Adsorption Capacity for Volatile Organic Compounds onto Activated Carbons by the Dubinin–Radushkevich–Langmuir Model, 497
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038
Regenerative Thermal Oxidation of Airborne *N*, *N*-Dimethylformamide and Its Associated Nitrogen Oxides Formation Characteristics, 991
Volatile Organic Compound Emissions from Dry Mill Fuel Ethanol Production, 1091

Voltage
Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone, 489

Waste Disposal
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243
Emissions from the Burning of Vegetative Debris in Air Curtain Destructors, 959
Release of Fluorocarbons from Insulation Foam in Home Appliances during Shredding, 1452

Waste Fraction
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Waste Management/Treatment
A Fuzzy Composting Process Model, 535
Analysis of Long-Term Settlement of Municipal Solid Waste Landfills as Determined by Various Settlement Estimation Methods, 243
Biodegradation of Organic Matters from Mixed Unshredded Municipal Solid Waste through Air Convection before Landfilling, 39

Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348
Response Surface Optimization of Substrates for Thermophilic Anaerobic Codigestion of Sewage Sludge and Food Waste, 309
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Waste Production
Development of a Local Carbon Dioxide Emissions Inventory Based on Energy Demand and Waste Production, 1032

Waste Stream
The Role of Mechanical and Biological Treatment in Reducing Methane Emissions from Landfill Disposal of Municipal Solid Waste in the United Kingdom, 155

Welding
Emissions of Chromium (VI) from Arc Welding, 252

Wind Effects
Identification and Interpretation of Representative Ozone Distributions in Association with the Sea Breeze from Different Synoptic Winds over the Coastal Urban Area in Korea, 1480

Wind Shear
Stable Plume Rise in a Shear Layer, 328

WINS
Laboratory and Field Evaluation of Crystallized DOW 704 Oil on the Performance of the Well Impactor Ninety-Six Fine Particulate Matter Fractionator, 14

Wood Burning
Emissions from the Burning of Vegetative Debris in Air Curtain Destructors, 959
Spatial Modeling for Air Pollution Monitoring Network Design: Example of Residential Woodsmoke, 893

WWII Growth
The First Half-Century: Pre- and Post-World War II Growth, 636

X-Ray Diffraction (XRD)
Simultaneous Removal of NO and SO_2 by High-Temperature Fluidized Zero-Valent Iron Processes, 303

Zero-Valent Iron (ZVI)
Remediation of Soil Contaminated with Pyrene Using Ground Nanoscale Zero-Valent Iron, 221
Simultaneous Removal of NO and SO_2 by High-Temperature Fluidized Zero-Valent Iron Processes, 303

Author Index

Addis, R.P.
Modeling Dispersion from Toxic Gas Released after a Train Collision in Graniteville, SC, 268

Agar, B.J.
Fuel Consumption, Emissions Estimation, and Emissions Cost Estimates Using Global Positioning Data, 348

Aggarwal, V.
Refinery Evaluation of Optical Imaging to Locate Fugitive Emissions, 803

Agraniotis, M.
Advantages and Possibilities of Solid Recovered Fuel Cocombustion in the European Energy Sector, 1178

Akiyama, K.
Laboratory Evaluation of an Aldehyde Scrubber System Specifically for the Detection of Acrolein, 1370

Alaimo, V.
Protecting Off-Site Populations and Site Workers from Vapor Discharges during Shallow Soil Mixing at the North Carolina State University National Priorities List Site, 1038

Allen, R.
Indoor/Outdoor Relationships, Trends, and Carbonaceous Content of Fine Particulate Matter in Retirement Homes of the Los Angeles Basin, 366
